

## SurgiCase Connect now available for iPad in United States

May 31, 2012  
Thursday, May 31, 2012

SurgiCase Connect is a free, interactive tool that enables surgeons to upload medical image data and communicate about 3D surgical plans and the design of 3D printed surgical guides with skilled clinical engineers at Materialise. In order to make SurgiCase Connect easier to use than ever, Materialise is proud to announce that there is now a SurgiCase Connect iPad App available for download in US App Store.

Thanks to this mobile platform surgeons will be able to fit SurgiCase Connect seamlessly into their fast-paced lives. In addition, the fact that they can use their fingers to manipulate 3D models and review surgical plans brings an extra "personal touch" to the planning of patient-specific surgical procedures. Perfection has never been so easy to achieve.

Looking ahead to the future, the Materialise team is constantly working to improve our 3D visualization and soon our graphics will be retina display ready for the next generation of iPads.

### About Materialise

With its headquarters in Leuven, Belgium, and branches worldwide, Materialise has been playing an active role in the field of Additive Manufacturing since 1990. In addition to having the largest capacity of AM equipment in Europe, Materialise also enjoys a stellar reputation as a provider of innovative software solutions. They have used their experience and expertise to create a better and healthier world through their involvement in rapid industrial and medical prototyping, and by providing bio-medical and clinical solutions such as medical image processing and surgical simulations. The advantages of AM have been used by Materialise to develop unique solutions that make a world of difference for its many customers with their prototyping, production, and medical needs. These customers range from large companies in the automotive, consumer electronics, and consumables sectors; to famous hospitals, research institutes, and clinicians; to individual consumers.
