Materialise Reports Second Quarter 2020 Results

LEUVEN, Belgium—(BUSINESS WIRE)—July 30, 2020 — Materialise NV (NASDAQ:MTLS), a leading provider of additive manufacturing and medical software and of sophisticated 3D printing services, today announced its financial results for the second quarter ended June 30, 2020.

Highlights – Second Quarter 2020

- Total revenue decreased 21.3% to 38,117 kEUR for the second quarter of 2020 compared to the 2019 period.
- Total deferred revenues from annual software sales and maintenance fees were 28,240 kEUR compared to 27,667 kEUR at December 31, 2019.
- Adjusted EBITDA decreased 33.1% to 3,382 kEUR for the second quarter of 2020 compared to the 2019 period.
- Net loss for the second quarter of 2020 was (1,932) kEUR, or (0.04) EUR per diluted share, compared to (297) kEUR, or (0.01) EUR per diluted share, for the 2019 period.
- Total cash was 125,454 kEUR at the end of the quarter; net cash was 3,905 kEUR, an increase of 2,947 kEUR compared to December 31, 2019.

Executive Chairman Peter Leys commented, “In the second quarter, our business suffered materially from the COVID-19 pandemic, with revenues decreasing more than 21% compared to last year’s period. We were able to realize cost savings in both sales and marketing and general administrative expense at a higher percentage rate than the revenue decline but maintained our strategically important research and development programs. These programs will position us to leverage interest in additive manufacturing, which is increasing in part due to the many 3D printed solutions that have addressed new market needs so expeditiously during the pandemic. Our balance sheet remains strong, with total cash of 125,454 kEUR and short-term debt of only 17,827 kEUR as of June 30, 2020. While our R&D programs and financial strength give us a solid platform from which to expand our existing business and take advantage of new growth opportunities when conditions improve, we draw equal confidence from the many examples of resilience, creativity and discipline that our workforce has shown worldwide throughout this difficult period.”

2020 Guidance

Mr. Leys concluded, "With the continued spread of COVID-19 in many parts of the world and the increased disruption to the global economy, we expect the pandemic's impact on our operations to be even more pronounced in the third quarter and to continue throughout the entire second half of the year. While we anticipate today that Materialise Medical will gradually pick up in the third quarter of the year, we expect that our Materialise Software and Materialise Manufacturing businesses will continue to be significantly impacted. Our overall goal remains to limit the impact of the COVID-19 crisis, including the associated cost-saving measures we take, on our long-term plans, in particular on our ongoing research and business development programs. Accordingly, we expect the third quarter impact of the crisis on our Adjusted EBITDA will be significant."

Non-IFRS Measures

Materialise uses EBITDA and Adjusted EBITDA as supplemental financial measures of its financial performance. EBITDA is calculated as net profit plus income taxes, financial expenses (less financial income), shares of loss in a joint venture and depreciation and amortization. Adjusted EBITDA is determined by adding non-cash stock-based compensation expenses and acquisition-related expenses of business combinations to EBITDA. Management believes these non-IFRS measures to be important measures as they exclude the effects of items which primarily reflect the impact of long-term investment and financing decisions, rather than the performance of the company's day-to-day operations. As compared to net profit, these measures are limited in that they do not reflect the periodic costs of certain capitalized tangible and intangible assets used in generating revenues in the company's business, or the charges associated with impairments. Management evaluates such items through other financial measures such as capital expenditures and cash flow provided by operating activities. The company believes that these measurements are useful to measure a company's ability to grow or as a valuation measurement. The company's calculation of EBITDA and Adjusted EBITDA may not be comparable to similarly titled measures reported by other companies. EBITDA and Adjusted EBITDA should not be considered as alternatives to net profit or any other performance measure derived in accordance with IFRS. The company's presentation of EBITDA and Adjusted EBITDA should not be construed to imply that its future results will be unaffected by unusual or non-recurring items.
